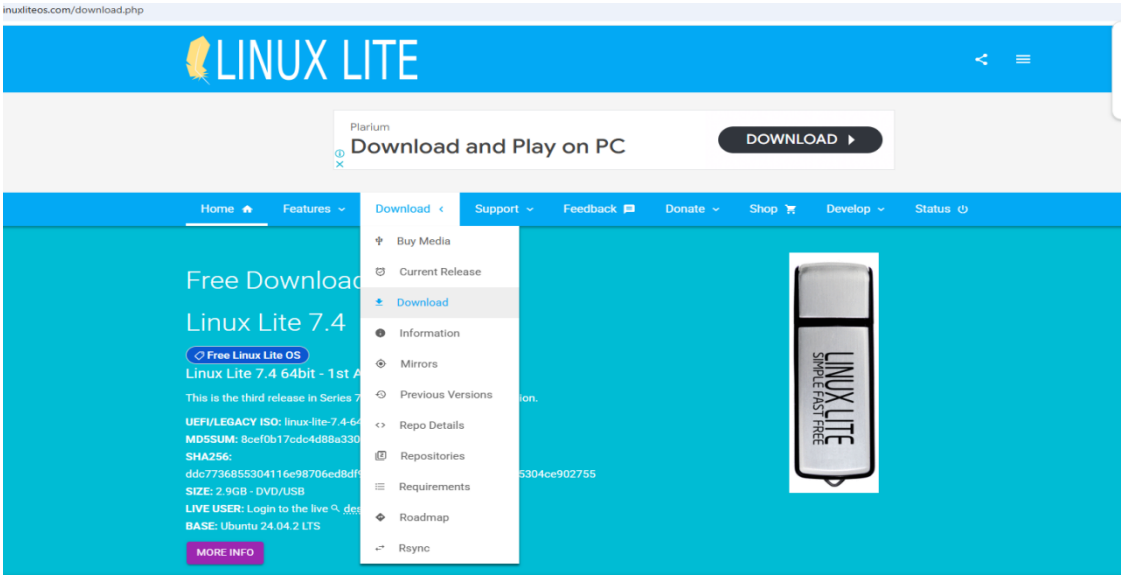
Installation Steps

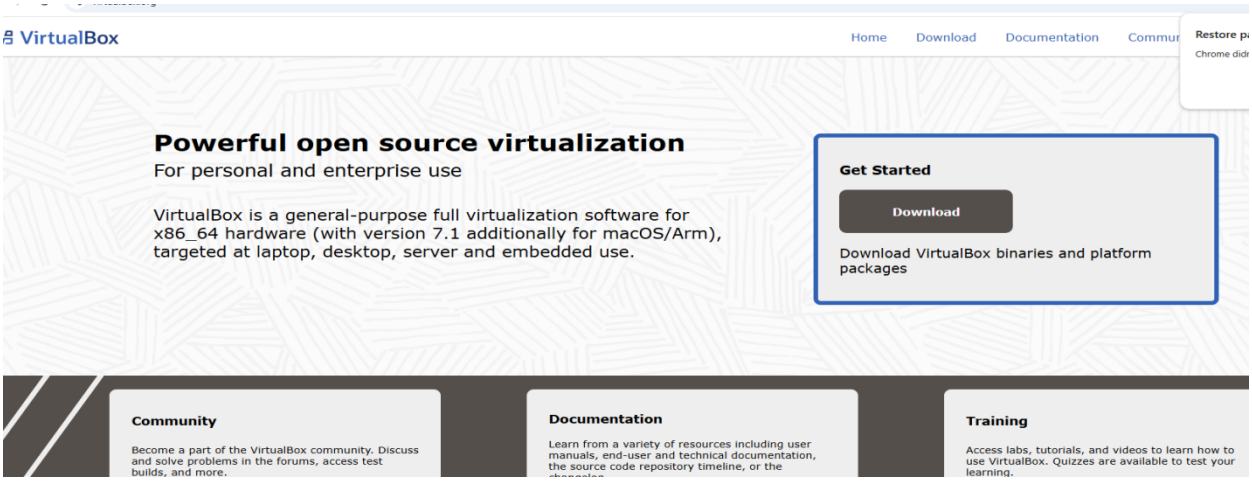
Step 1: Download Linux Lite ISO

1. Visit https://www.linuxliteos.com
2. Go to the **Download** page.
3. Download the latest .iso file (e.g., linux-lite-6.6-64bit.iso).



Step 2: Install VirtualBox

1. Go to https://www.virtualbox.org
2. Download and install the version for your OS (Windows/macOS/Linux).

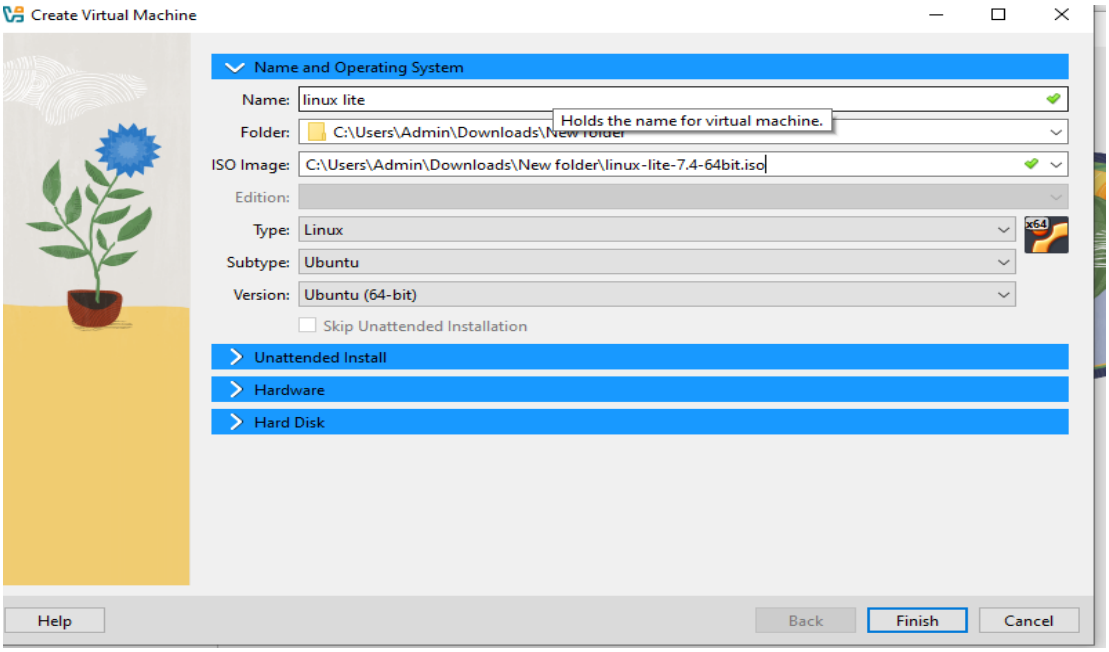


Step 3: Create a New Virtual Machine

1. Open **VirtualBox**.
2. Click **New** or press Ctrl + N.

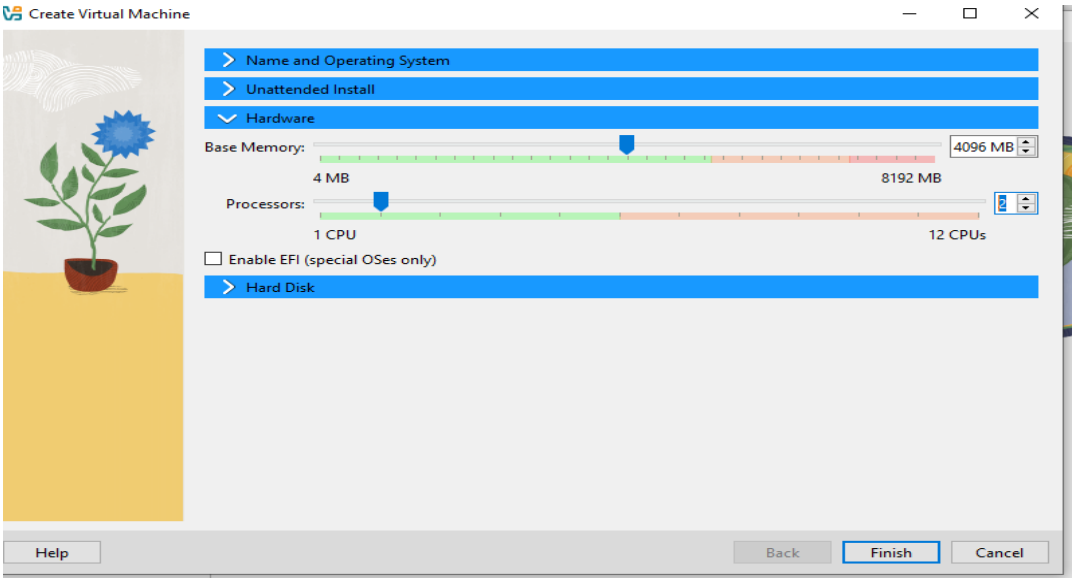
➤ In the dialog:

✔ Name: Linux Lite
✔ Type: Linux
✔ Version: Ubuntu (64-bit)



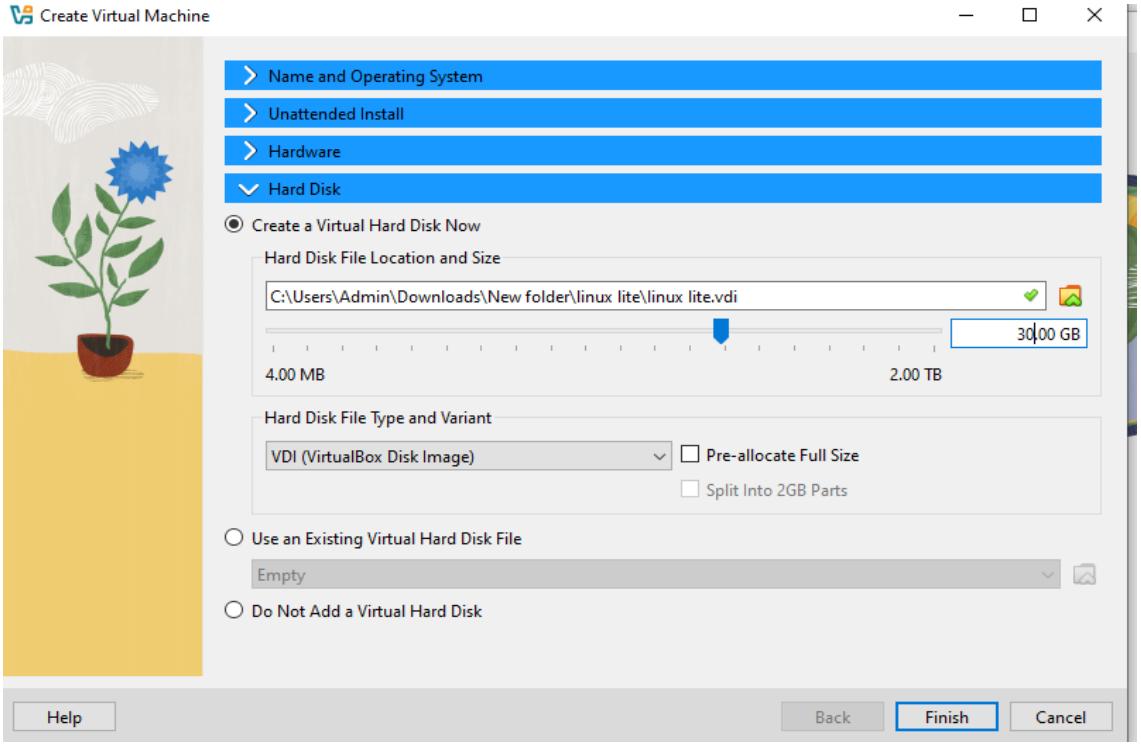
Step 4: Allocate Memory (RAM)

1. Minimum: **2048 MB** (Recommended: 4096 MB)
2. Click **Next**



Step 5: Create a Virtual Hard Disk

1. Size: **30 GB or more**
2. Click **Finsh**



Step 6: Adjust VM Settings

Select the created VM, click **Settings**

Under **System**:

- ✔ Uncheck **Floppy** in Boot Order.

Under **Processor**:

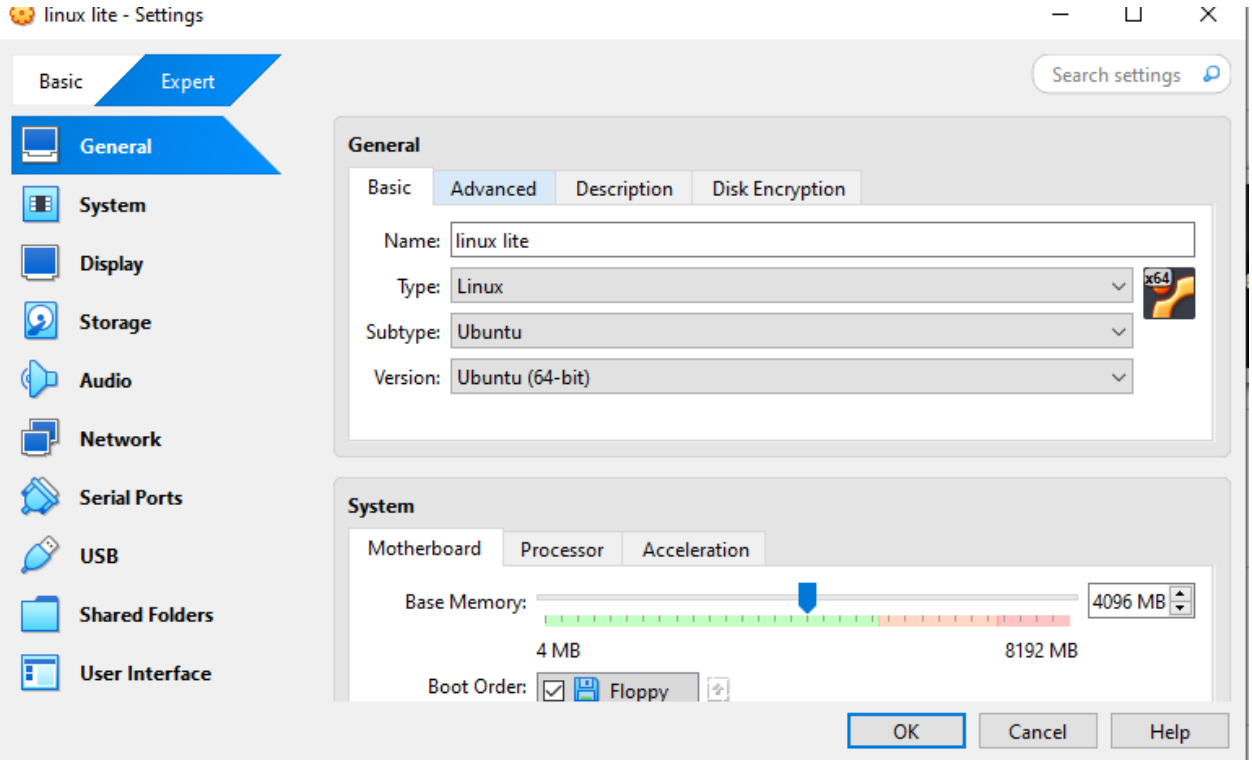
- ✔ Set CPUs to **2 or more**.

Under **Display**:

- ✔ Set **Video Memory** to **128 MB**

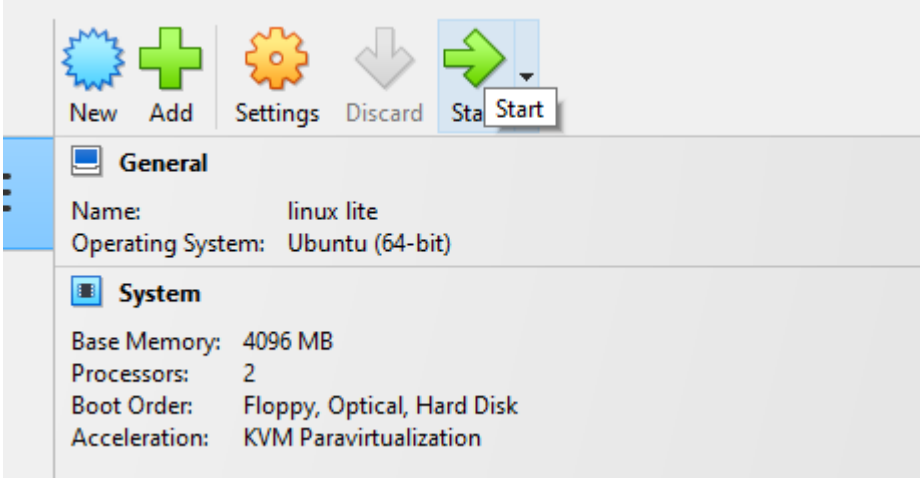
Under **Storage**:

- ✔ Select **Empty** under Controller: IDE
- ✔ Click **Disk Icon 'n Choose a disk file**
- ✔ Select your downloaded **Linux Lite ISO**



Step 7: Start the VM

1. Click **Start**
2. Boot into the **Live Linux Lite** session.

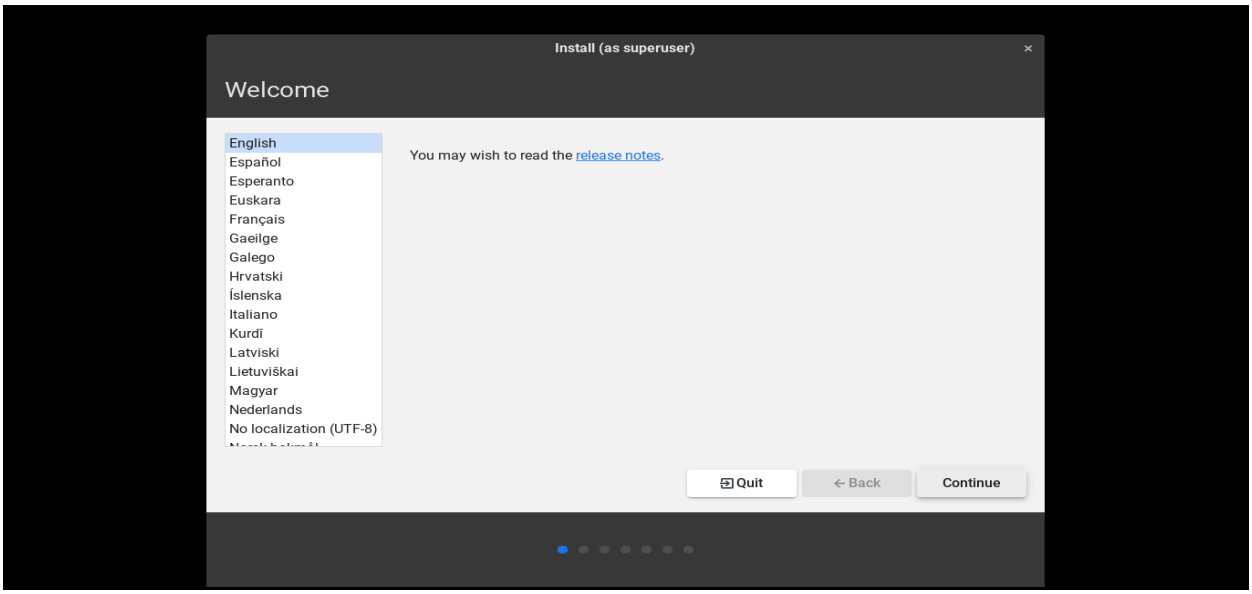


Step 8: Install Linux Lite

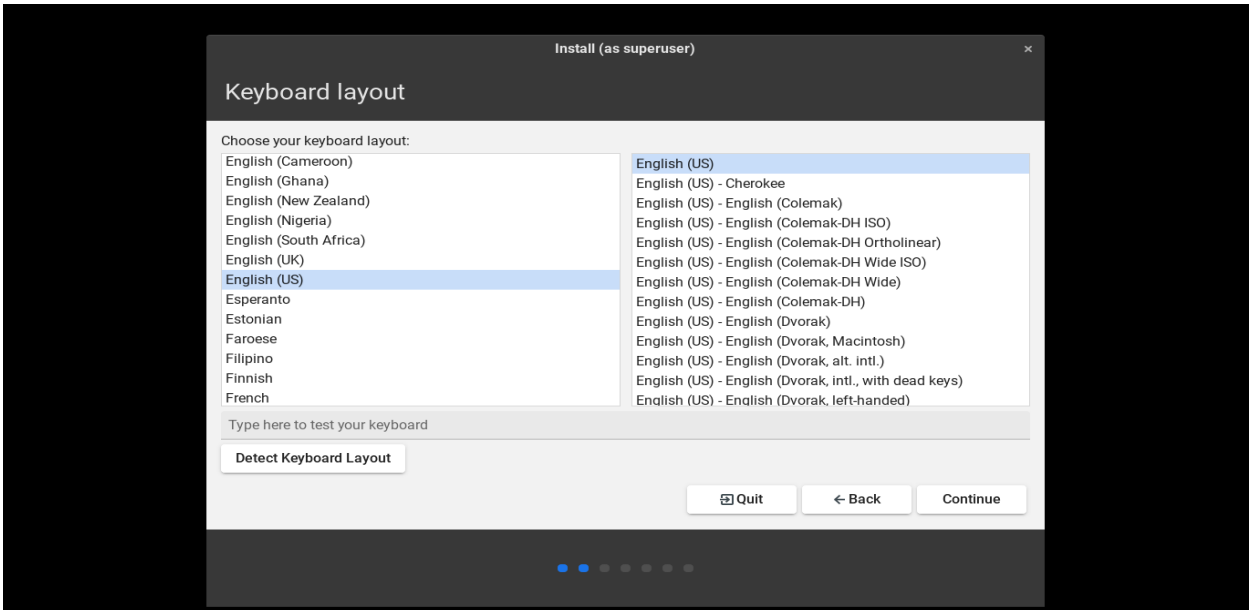
1. Double-click **Install Linux Lite** on the desktop.
2. Follow the installer:

➤ Key Screens:

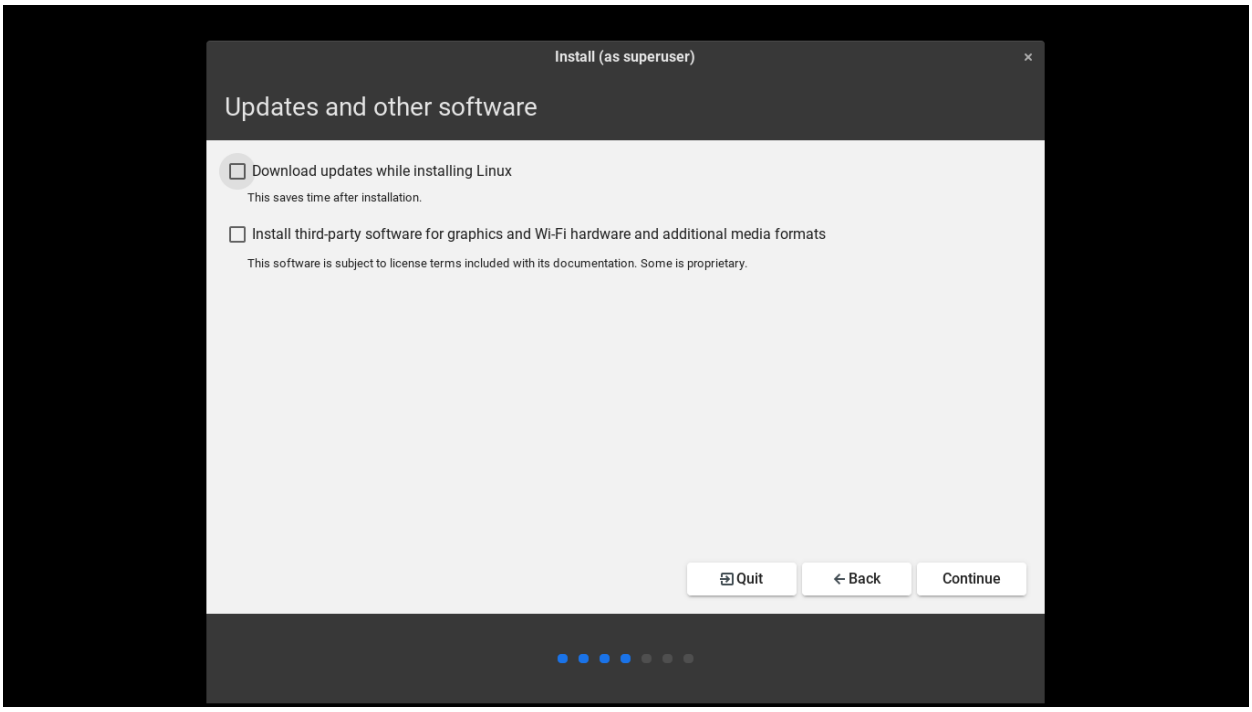
✔ Select **Language**



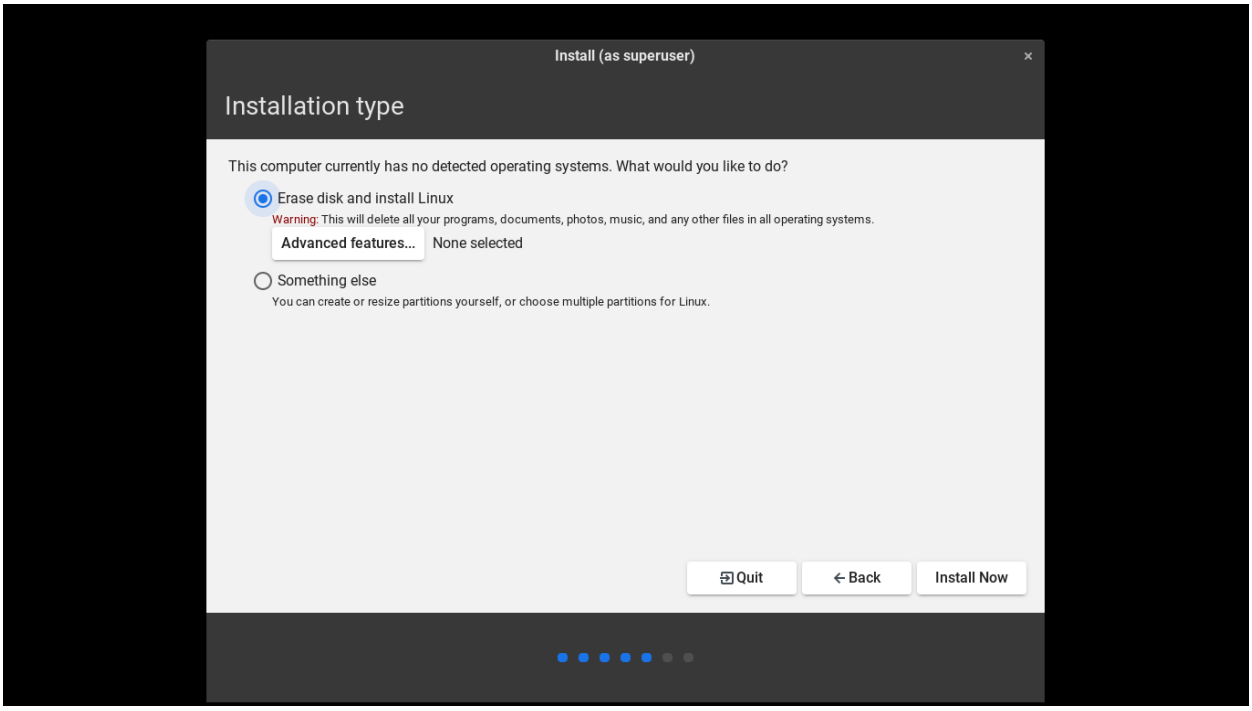
✔ Choose **Keyboard Layout**



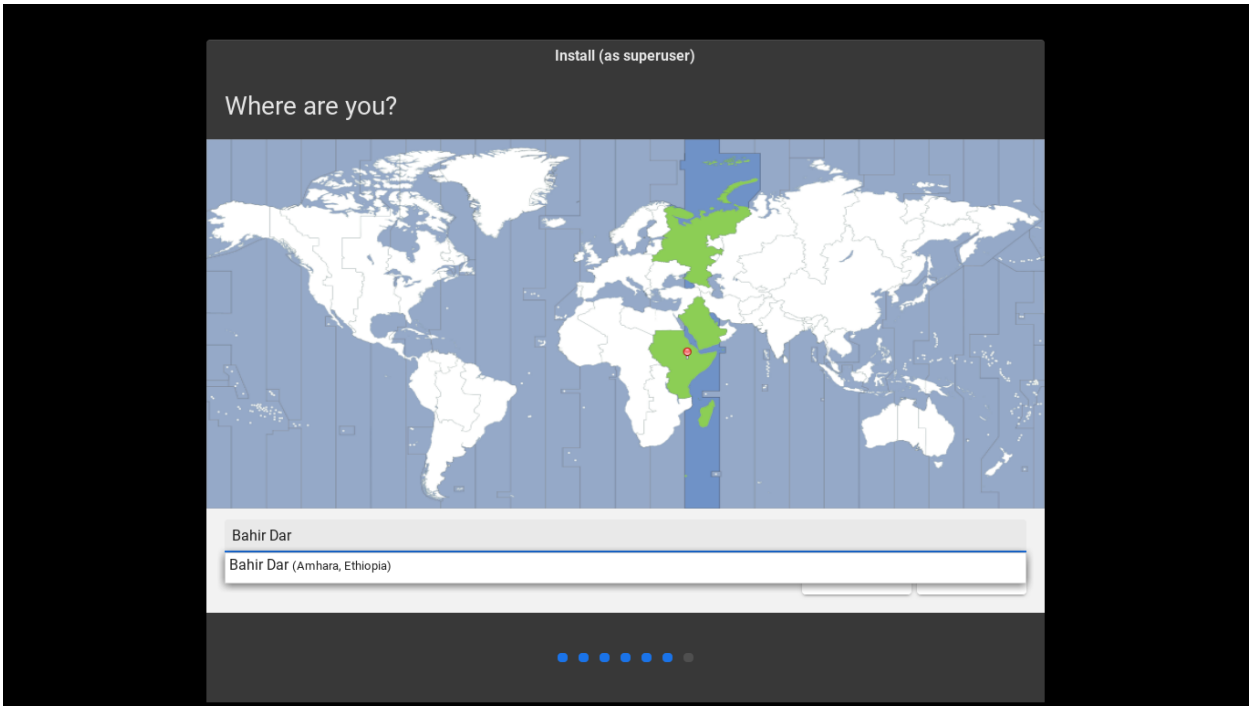
✔ **Install third-party software** (optional)



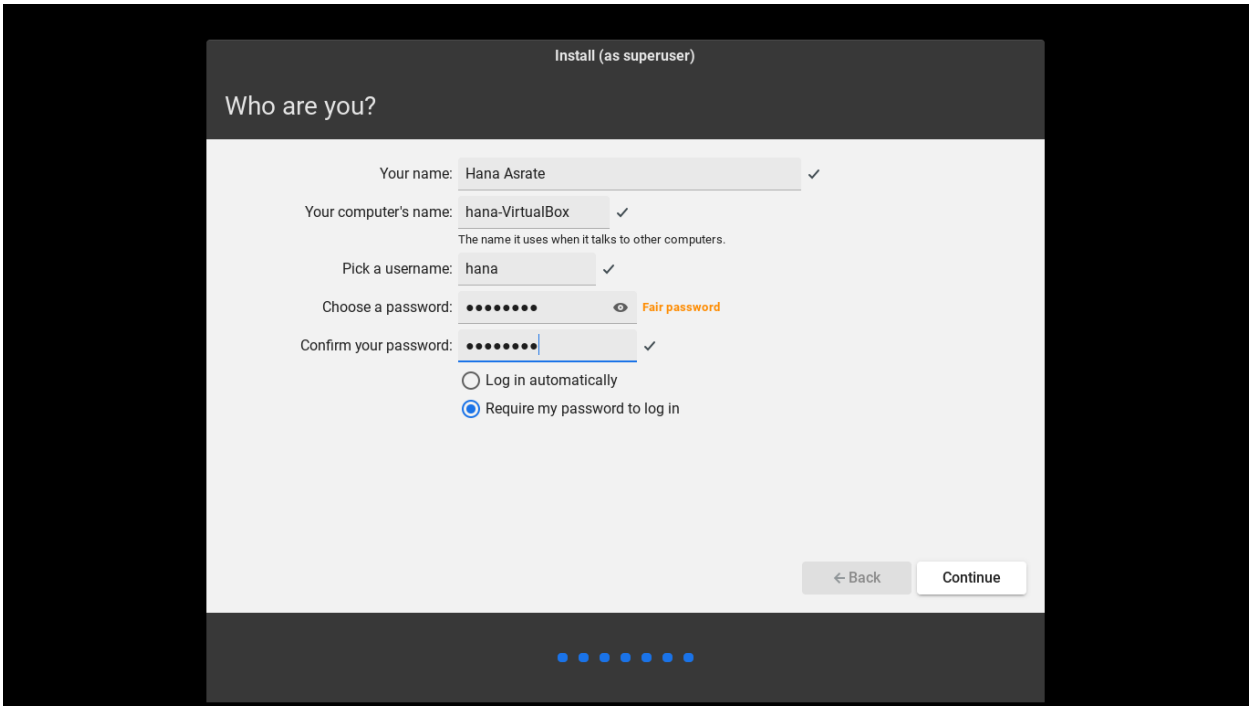
✔ Installation Type: Choose **Erase disk and install Linux Lite**



✔ Set **Time Zone**



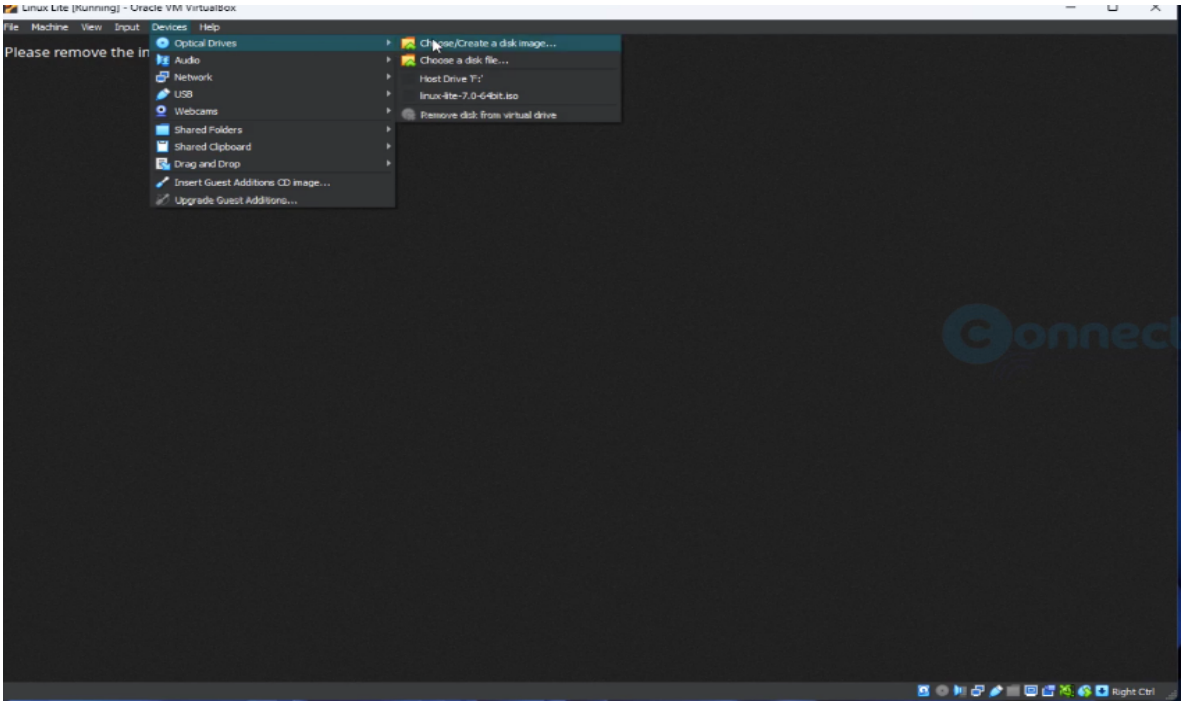
✔ Enter **Username & Password**



Step 9: Remove ISO After Install

➤ When prompted to remove installation media:

1. Go to **Devices > Optical Drives > Remove disk from virtual drive**
2. Press **Enter** to reboot.



Step 10: First Boot & Updates

1. Log in with your credentials.
2. Open **Terminal** and run:
